about ingredients

The chocolate flowers are handmade, each one of a kind.

Our flowers are not only eye-catching but also completely edible, ensuring a delightful experience from the stalk to the blossom.

The stalk of our chocolate flowers is crafted from dark chocolate, infusing richness and depth into every bite. The blossoms are made from white modeling chocolate, shaped and formed by our skilled artisans. To enhance their flavors and bring a touch of purity of nature, we season the blossoms with organic pastes of berries and fruits. These organic pastes also carry the qualities of antioxidants.

We are proud to use natural plant-based colorants, such as beetroot and carrot, which are carefully selected with regulations and our customers' health in mind.

The colors are derived from nature, blending harmoniously with the chocolate canvas. Whether you're seeking a creation for a special event or wish to showcase your own private label, Karilá offers the flexibility to personalize our products according to your preferences. Simply share your wishes with us, and our dedicated team will work tirelessly to bring your vision to life.

Elevate your celebrations and create unforgettable moments with our unique flowers.
